 **SIDI** CHARGER

### THE SOLE

TA sole is best suited for riders whose feet are off the pegs often.  
Has features excellent rear brake feel.  
Easily replaced by a cobbler.  
Composite inner sole.

### PROTECTION

Toe area covered in protective plastic.  
Rigid, shock resistant, anatomically shaped heel for maximum protection.  
Malleolus external guard to enhance protection of those tender small foot bones.  
Split grain leather inner anti-wear/heat panel.

### FIT & FUNCTION

Cam-lock buckle system.  
Replaceable bolt-on buckles.  
Single Flex System upper.  
Removable arch support.  
The Charger boot is 1.4 pounds lighter than Sidi's own Crossfire boot.  
Italy's finest top grain leather is used as a base material with Microfiber being used on the tongue area.  
Slim, cool non-bootie design.  
Cambrelle lining

## “Reviews

*Break-in time is almost non-existent, as the Charger feels comfortable right from the beginning. The durability of the boots are also second to none, and over the course of testing, we never had any problems with them falling apart or wearing out quickly. This boot is a great investment, if we were to go out and spend our hard-earned money on a new pair of boots, these would be at the top of our list.*
